

PEDRO TOZAKI

Full-Stack Software Engineer

São Paulo, Brazil (Remote) | tozaki.dev | pedro@tozaki.dev | linkedin.com/in/pedro-tozaki | github.com/tamotsutozaki

Summary

Software engineer with 5+ years in tech, currently as a full-stack developer building and shipping production software in C#/.NET Core and React/Next.js. Earlier roles across IT and business operations taught me to understand the business problem before writing the first line of code. Full professional English (TOEIC 835). Open to remote and international teams.

Experience

ACSN — Software Development

Jan 2025 – Present

Junior Software Developer (Dec 2025 – Present) · Software Development Intern (Jan 2025 – Dec 2025) Salto, SP, Brazil

- Migrated 10+ legacy ERP modules (used by 6,000+ business clients) to modern web platforms, preserving full functional fidelity.
- Built RESTful APIs in C#/ASP.NET Core under Clean Architecture, with clean-code patterns and unit tests for complex business logic.
- Cut heavy-query execution time by ~3x by introducing Dapper alongside EF Core.
- Developed responsive React and Angular interfaces with custom components that standardized the product UX.
- Drove an AI-assisted, human-reviewed workflow (specialized agents for requirements, docs, architecture, build and QA), delivering features up to 5x faster.
- Promoted from intern to Junior Software Developer within one year on delivery and code quality.

Projects

Lirium | C#/.NET, Next.js, React, Flutter, PostgreSQL, Google Gemini

- Voice-first productivity app (web, iOS, Android): a single C#/.NET backend (Clean Architecture + EF Core, PostgreSQL) serves web and mobile over REST + JWT.
- Headless Google Gemini AI layer with multimodal audio input, structured JSON output, and production hardening (retries, rate-limit/timeout handling, anti-hallucination validation).
- Next.js/React web (PT/EN i18n) and Flutter mobile with native STT/TTS; backend containerized with Docker.

ToMore | Astro SSR, TypeScript, Tailwind, Cloudflare Pages

- Bilingual (PT/EN) software studio site with a case-study portfolio via Content Collections and full SEO (JSON-LD, hreflang, sitemap).
- Working contact form with Zod validation, anti-spam honeypot, and delivery via Resend.

Eternize | Next.js, TypeScript, Tailwind, Cloudflare Pages Function

- Institutional site + portfolio with a serverless shipping calculator (SuperFrete API proxy, token kept server-side via a Cloudflare Pages Function).

Skills

Languages & Frameworks: C#, .NET Core / ASP.NET Core, TypeScript, JavaScript, React / Next.js, Astro, Flutter, Angular

Data: PostgreSQL, EF Core, Dapper, Supabase, SQL Server

Architecture & Practices: REST API design, Clean Architecture, Clean Code, unit testing, Git

Cloud & DevOps: Docker, GitHub Actions (CI/CD), Cloudflare Pages, Render

AI: LLM integration (Google Gemini), structured output, AI-assisted development workflow

Education

FATEC Indaiatuba

2024 – 2027

Systems Analysis and Development (in progress)

Indaiatuba, SP, Brazil

Universidade Anhembi Morumbi

2017 – 2020

B.A. in Business Administration

São Paulo, SP, Brazil

Languages & Certifications

Languages: English — Full professional proficiency (TOEIC 835, 2025) · Portuguese — Native

Certification: Test of English for International Communication (TOEIC), ETS
